FOREWORD

CHANGING. IMPROVING. DELIVERING.

2018 WAS A REMARKABLE YEAR FOR UNDP.

It was our first full year of implementing a new Strategic Plan – a plan built to help countries deliver on the Sustainable Development Goals.

At a time of change for the United Nations, we worked with our partners to help people get on their feet and stay there – meeting short-term needs while laying the foundations for a hopeful, confident future.

In Yemen and the Lake Chad region, though conflict and fragility continue to block the arteries of progress, we saw a new way of working between humanitarian and development actors take root, bridging life-saving response with recovery and development.

From India to Fiji, we saw a surge of innovation connecting people with the services they need to get out of poverty, shaping governance solutions of the future. A youth employment and entrepreneurship initiative that started in Rwanda back in 2013 is now in 10 countries and set to be scaled up continent-wide by the Africa Union.

In the next pages you will see some of the many results we achieved in 2018. They reinforce that UNDP is uniquely designed to help solve complex development problems in a courageous, integrated and innovative way.

They reinforce a trait I have come to admire in this organisation: its potential to take change to scale. It is a potential we need to fulfill to support countries in meeting the ambition of the 2030 Agenda.

In 2018, we demonstrated that we are up to the challenge, with the highest programme delivery in five years, restored financial stability, increased efficiency and a geographically-diverse, gender-balanced leadership team – even as we powered UN reform and, now, step back from coordinating United Nations agencies in the countries we serve.

As Administrator, it was a true pleasure to lead the #NextGenUNDP transformation during 2018, disrupting how we think, invest, manage and deliver to accelerate sustainable development.

Today, UNDP's mission has never been as clear: we are here to help the 170 countries and territories in which we currently work to reach their development priorities so that no one on this planet is left behind.

We look forward to your partnership and collaboration on the journey.

from crisis got a job or im-
proved their livelihoods

27 MILLION
people were stronger
in the face of climate change
256 MILLION
tonnes of carbon emissions cut

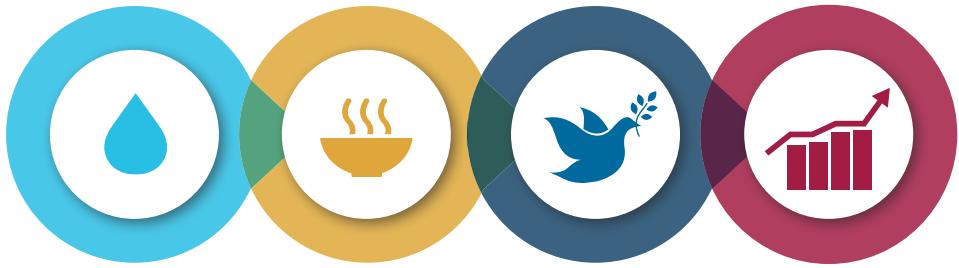

OUR RATIONALE

CONNECTING THE SDGs

The Sustainable Development Goals provide a holistic blueprint for change – an integrated plan to end poverty, protect the planet, and ensure that all people enjoy lasting peace and prosperity.

UNDP's role is to help governments and actors throughout society to power and accelerate their progress towards the Goals, while keeping the global vision intact and on track.

Combining the ambition of Agenda 2030 with the SDGs now demands a new kind of approach to development: the more disruptive we are, the more transformational the solutions will be.

DEVELOPMENT IS A VIRTUOUS CYCLE

UNDP knows from experience that incremental change is not enough. Tackling drought in Somalia is not just about water. Fighting poverty in Argentina is not just about income. Promoting hydrogen-based clean mobility in China is not just about technology.

In reality, preventing drought and famine will consolidate peace and security, and increase confidence in the economy. Fighting poverty will improve people's health through access to medical insurance. Promoting hydrogen energy solutions will improve public services, make cities healthier, and help stop global climate change.

In short, one well-designed, positive change leads to many others.

#NEXTGENUNDP

WHERE PAST, PRESENT AND FUTURE MEET

#NextGenUNDP builds on our existing assets – worldwide presence, thought leadership, and over 50 years of experience – to respond to a fast-changing development landscape.

We are creating new solutions, building collaboration platforms, and sparking new partnerships and financing instruments. These innovations are disrupting the way our organisation thinks, invests, manages, and delivers – so we can perform faster and better than ever.

Photo: Rana Sweidan / UNDP Lebanon

THINK

From reimagining the **Human Development Report**, to improving how we **use data to fight poverty**, to speeding up results through the **Accelerator Labs**, #NextGenUNDP is boosting countries' progress toward the SDGs.

INVEST

Investing **US\$5 billion** each year in development progress, and as countries' partner of choice to access **global funding windows**, #NextGenUNDP understands finance and risk, and how to **bring more investors** to the table.

MANAGE

A better workplace means better results, so we are pushing the boundaries to **improve our business model, balance our books, increase efficiency, go digital, and invest in our people** for a more innovative, effective and efficient #NextGenUNDP.

DELIVER

With our **Global Policy Network** connecting UNDP's 17,000-strong workforce, **country platforms in 46 countries**, and a determination to **innovate**, #NextGenUNDP is breaking down silos with partners to change how complex problems are solved.

OUR LEADERSHIP

THE TEAM

A gender-balanced, geographically diverse new team of Assistant Secretary-Generals and Resident Representatives now leads UNDP in and across the 170 countries and territories we currently serve. With 17,000 people connected through our new Global Policy Network, UNDP is one of the world's largest, most diverse, fastest learning organisations. Meet the team.

GENDER PARITY AND INCLUSION AT UNDP

Half of UNDP's leaders and staff across the world are women. Our commitment to gender equality runs deep and plays a central part in UNDP's new People for 2030 strategy, designed to enhance how we attract, train and retain world-class development talent. But we know there is more to do, because a better workplace means better results. In 2018, new policies and measures on gender parity, sexual harassment and disability inclusion advanced a more inclusive, equal and respectful workplace. A new talent programme for young professionals with a disability – the first of its kind in the UN – was launched by UNDP and UNV.

WHAT

STRATEGICALLY ON TRACK

UNDP's Strategic Plan for 2018-21 to help accelerate progress towards Agenda 2030 has three integrated objectives: to eradicate all forms of poverty, accelerate structural transformations, and build resilience to shocks and crises. In 2018, UNDP delivered results against each, accelerating local action to drive global change while embarking on a major shift in the way it works.

Poverty

Governance

Resilience

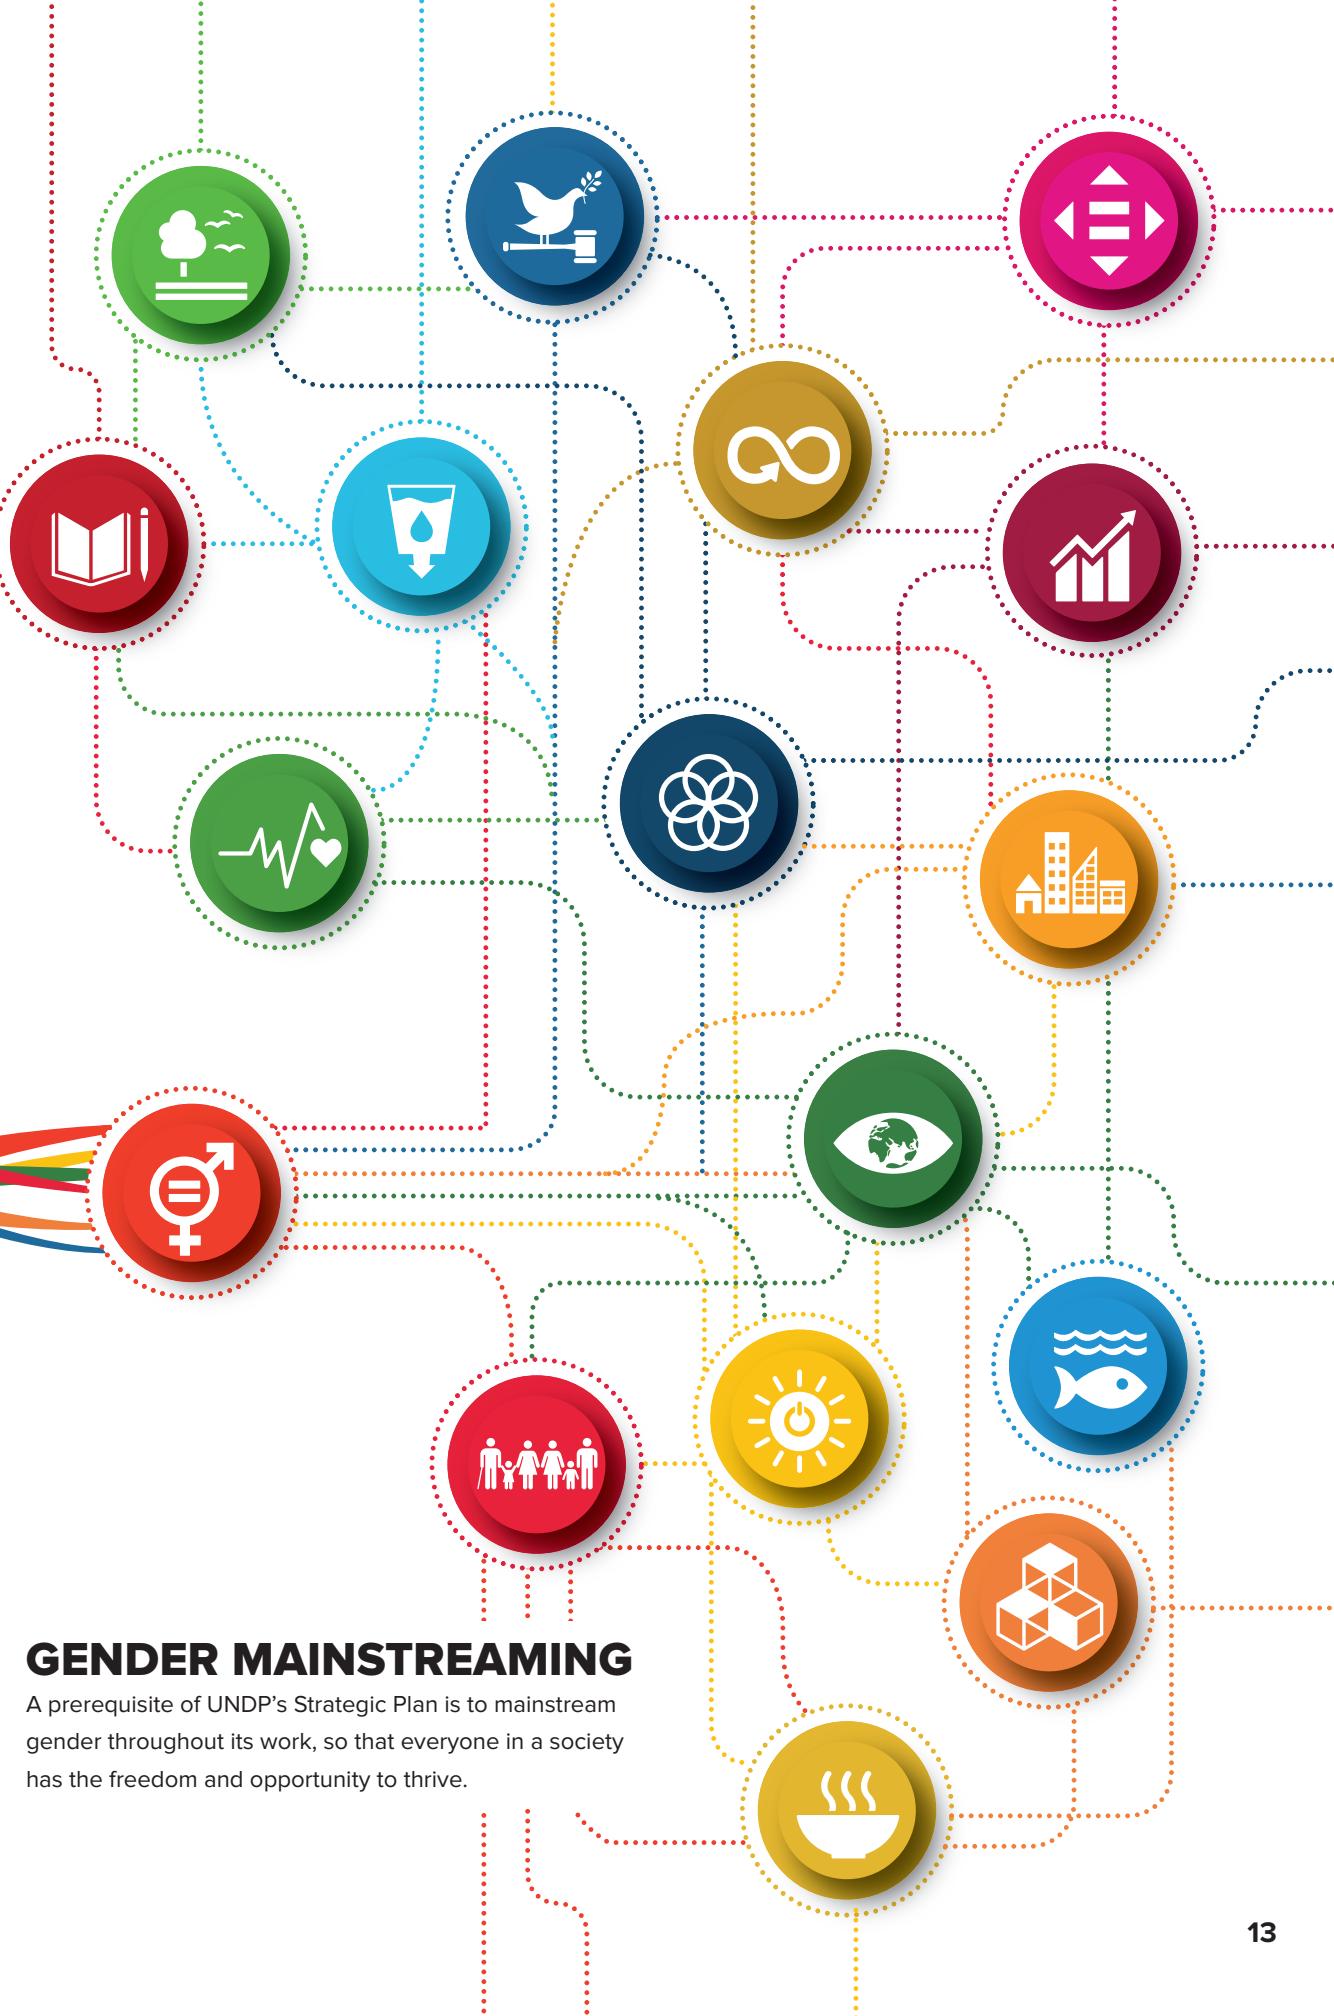

Environment

Energy

Gender

SIGNATURE SOLUTIONS

In 2017, UNDP defined and implemented six cross-cutting approaches to development, known as Signature Solutions. A robust, integrated way to put our best work – or “signature” skillset – into achieving the SDGs. The following pages explain the Solutions, highlighting the impact each one made in 2018.

GENDER MAINSTREAMING

A prerequisite of UNDP's Strategic Plan is to mainstream gender throughout its work, so that everyone in a society has the freedom and opportunity to thrive.

PROTECTING THE LIVELIHOODS OF AMAZON COMMUNITIES PROTECTS OUR PLANET, TOO

The deforestation of the world's greatest life source is a global, environmental threat – especially to those who live there. UNDP is helping 69 indigenous communities in Peru alone, connecting them with regional governments and the Ministry of Agriculture to ensure their land rights will be upheld for future generations.

Photo: Renato Pajuelo/UNDP Peru

SIGNATURE SOLUTION: POVERTY

KEEPING PEOPLE OUT OF **POVERTY**. 31 MILLION AT A TIME.

It's no coincidence that our first Signature Solution relates directly to the first Sustainable Development Goal: to eradicate all forms of poverty, wherever it exists. For UNDP, helping people to get out and stay out of poverty is our primary focus. It features in our work with governments, communities and partners across the 170 countries and territories in which we operate.

In 2018, we helped nearly half of the countries in the world to make the SDGs relevant at home, aligning local and national priorities with the Goals for both immediate and long-term benefits. Given the interconnected nature of the SDGs, this advanced progress towards ending the many faces of poverty – once and for all.

**4
MILLION**

PEOPLE LIVING IN OR RECOVERING FROM CRISIS GOT A JOB OR IMPROVED THEIR LIVELIHOOD

**20
MILLION**

PEOPLE GAINED ACCESS TO FINANCIAL SERVICES

**27
MILLION**

PEOPLE HAD STRONGER LIVELIHOODS IN THE FACE OF CLIMATE CHANGE

..... UN partners with whom we worked most frequently on Poverty in 2018

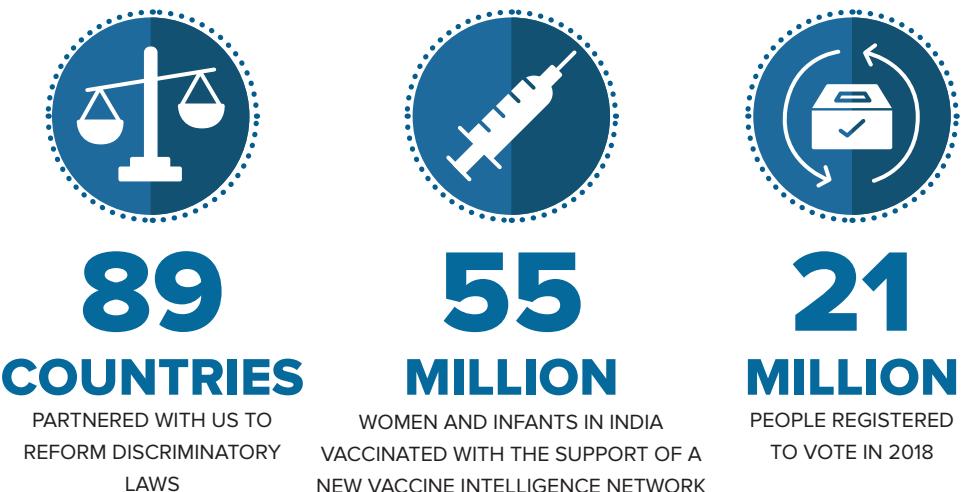

SPREADING GOOD GOVERNANCE. STOPPING THE OTHER KIND.

People's lives are better when they have peace, freedom and opportunity, when government is efficient and responsive, when rights and the law are respected and upheld, and when the forces of globalization pull people up rather than hold them back.

In 2018, UNDP supported 56 countries in their electoral processes. We put digital solutions to the test to improve civic engagement, manage health commodities, and address corruption – helping to shape the next generation of governance solutions.

UNDP helped to deliver last mile health services in 45 countries through our partnership with the Global Fund to Fight AIDS, Tuberculosis, and Malaria. We continued to advocate for those less heard because of stigma, discrimination and violence. This developed the first round of investment portfolios for The Spotlight Initiative – a \$500 million partnership between the UN and the European Union to eliminate all forms of violence against women and girls. Meanwhile, we increased the expansion of the UN Partnership to Promote the Rights of Persons with Disabilities to 38 countries through the Multi-Partner Trust Fund Office – strengthening our focus on leaving no one behind.

..... UN partners with whom we worked most frequently on Governance in 2018

A HAPPY KABUL VOTER, DOCUMENTED IN INK

UNDP believes that law-abiding democracy includes the freedom of every adult to vote in his or her country. Success starts with ensuring open registration, so that each voter is accounted for honestly, no matter what their gender or background is.

Photo: Lorenzo Tugnoli/UNDP

RISING RESILIENCE IN THE CROSSHAIRS OF THE SOUTH PACIFIC

Tuvalu, with the second-lowest maximum elevation of any country, is highly vulnerable to the effects of cyclones and rising sea levels. UNDP has scaled-up its community-based projects that protect coastal areas, food and water security to better prepare people and islands for future extreme weather events.

Photo: Silke von Brockhausen/UNDP

SIGNATURE SOLUTION: RESILIENCE

CRISIS RESPONSE, RECOVERY AND PROTECTION. DONE BETTER.

For the millions of people across the world living in or recovering from crisis, there is no quick or easy way out. Conflict, war, epidemics and disasters drive poverty, inequality, weak governance, and the destruction of the environment. It is time to break this cycle.

In 2018, UNDP spent over \$1 billion to strengthen resilience to shocks and crisis with the support of partners and advocated for integrated, risk-informed approach to development, including planning for and recovering from disasters.

A new way of working with humanitarian partners has taken root in UNDP, bridging urgent, life-saving response with resilience, recovery, stabilization and development needs, because helping communities to find or return to lives of dignity as quickly as possible is everyone's long-term goal.

ENVIRONMENTAL SOLUTIONS. THE WAY NATURE INTENDED.

The Sustainable Development Goals set out an integrated global plan to end poverty, protect the planet, and ensure that all people enjoy lasting peace and prosperity. Climate change and environmental damage threaten that plan – all of it.

Working across our development mandate, UNDP helps countries to protect the people most vulnerable to shocks, defend the diversity of nature, and stop climate change from further altering the balance of our planet. At the same time, we work with our partners to accelerate an evolution to green economic pathways, investing in future-focused partnerships, industries, jobs and livelihoods.

A long-standing partner of the Global Environment Facility, and now with the second-largest Green Climate Fund portfolio in the world, UNDP is the primary actor on climate change in the United Nations. Our portfolio is built on countries' trust in our work. Our aim is to help build the Paris Agreement and all environmental agreements into the heart of countries' development priorities. After all, the food, shelter, education and opportunities of billions of people depend on getting this right.

SIGNATURE SOLUTION: ENERGY

GOODBYE FOSSIL FUELS. HELLO CLEAN AFFORDABLE ENERGY.

UNDP helps countries transition away from the use of finite fossil fuels and towards clean, renewable, affordable sources of energy. Our sustainable energy portfolio spans more than 110 countries, leveraging billions of dollars in financing, including public and private sources.

With this financial support, we partner with cities and industries to increase the share of renewables in countries' national energy mix; establish solar energy access to people displaced by conflict; fuel systemic change in the transport industry; and generate renewable ways to light homes for millions of people.

Given the fact that clean, affordable energy will power progress toward achieving the Sustainable Development Goals, UNDP adapts to the needs of each country across all the development settings in which we work.

EMPOWERING WOMEN AND GIRLS. ENGAGING MEN AND BOYS.

Gender equality and women's empowerment drive change for the good of everyone. Today, women, girls, and gender minorities are subverting inequalities and stereotypes. And we're here to help. As the UN's leading development agency, we seek to integrate gender equality into every aspect of our work, collaborating with our partner countries to end gender-based violence, tackle climate change with women farmers, and advance female leadership in business and politics.

In 2018, we positively impacted the lives of millions of women. We helped countries and communities change the rules on access to finance, land and decision-making. We worked with the disproportionate number of women affected by crisis and conflict. And we broke down barriers that prevented women from voting. Because no one should be left behind.

RETHINKING DEVELOPMENT FROM WITHIN

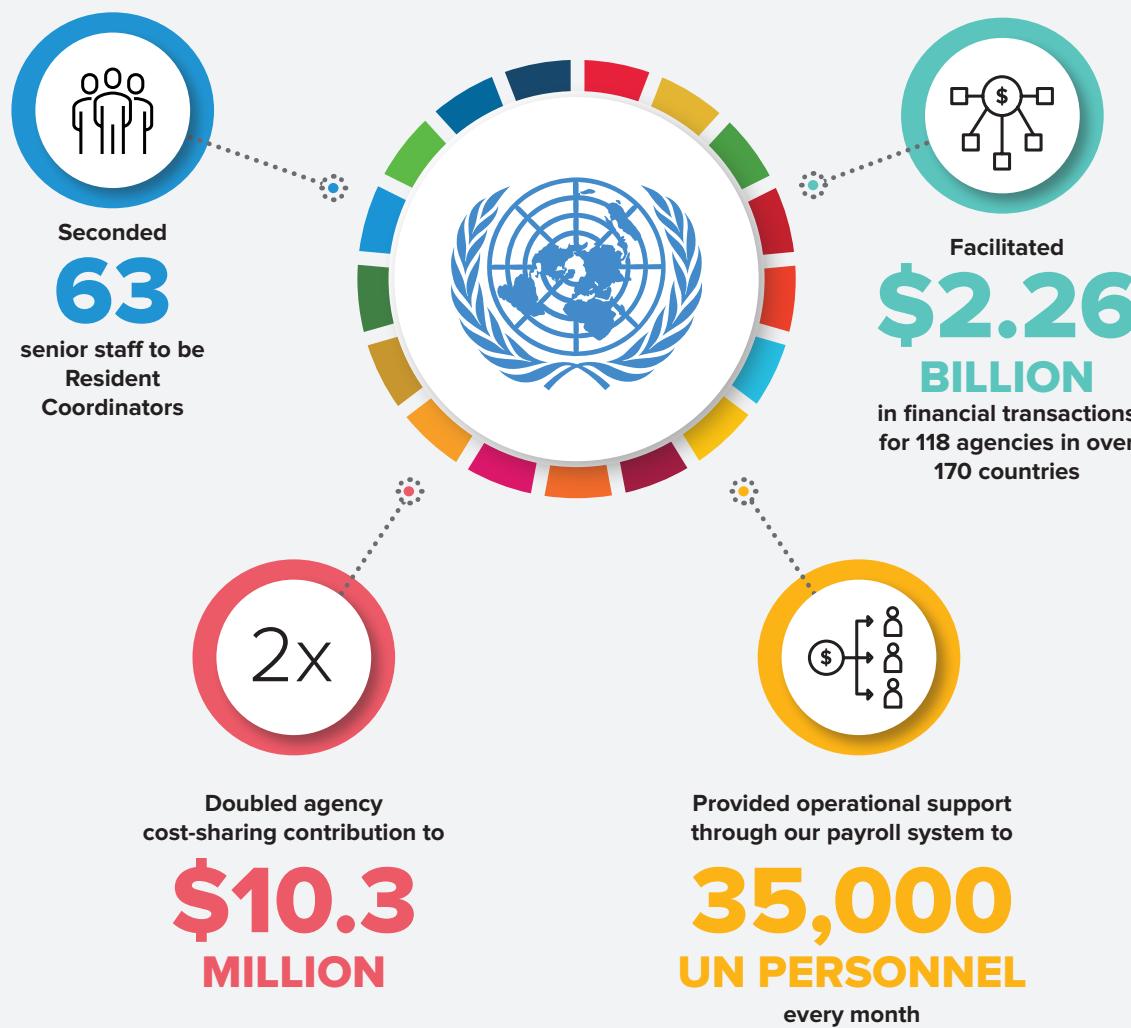

As the UN's lead development agency, no organisation is better qualified to drive the future of development. This is fueled by our scale plus our network of partners in and outside the United Nations: public sector, private sector, long-standing and emerging.

The ambition of the Sustainable Development Goals requires an accelerated pace of change. We are pushing boundaries in the way we manage our systems and resources, and adapting our business model for a more effective, efficient and innovative UNDP. By improving internally, we also improve our development results.

POWERING UN REFORM

As the United Nations changes to meet the challenge of the Sustainable Development Goals, UNDP is supporting the process at every step. In 2018, UNDP invested huge efforts to ensure a successful reform – from seconding dozens of its senior staff to doubling its contribution to the resident coordinator system. UNDP did so while investing \$5 billion* in development results, our highest level of investment over the past five years.

THE UNDP FAMILY

HOSTING SPECIALIZED FUNCTIONS OF THE UN SYSTEM

UNDP hosts a wider family of partnerships and programmes that are crucial for the UN's work around the world.

MULTI-PARTNER TRUST FUND (MPTF)

The UN's Multi-Partner Trust Fund Office (MPTFO) has channeled over \$10 billion of pooled funding to development, incentivizing integrated UN responses to complex issues. The Office supports the \$27 million UN Partnership on the Rights of Persons with Disabilities, which reached 38 countries in 2018, and provides the platform for the Spotlight Initiative, a \$500 million partnership between the UN and the European Union to eliminate all forms of violence against women and girls.

UN VOLUNTEERS

UN Volunteers deploys over 7,000 professionals each year – 83% from the global South – to 38 UN entities in over 140 countries, alongside 17,000 online volunteers. In 2018, 137 Volunteers served in 62 Resident Coordinator Offices, focused on assignments from coordination, to peace and development, to the SDGs. UNV also champions people's participation in their own communities' development, strengthening ownership and fortifying results.

UNITED NATIONS OFFICE OF SOUTH-SOUTH COOPERATION (UNOSSC)

As part of our support to advancing South-South cooperation, UNDP hosts the UN Office for South-South Cooperation (UNOSSC) which promotes, coordinates and supports South-South and triangular cooperation globally and within the UN system. In 2018, UNOSSC brought together 200 Southern think tanks to foster dialogue and research on development solutions.

UNITED NATIONS CAPITAL DEVELOPMENT FUND (UNCDF)

UNCDF offers “last mile” finance models, primarily to Least Developed Countries, to unlock public and private finance for the poor. With a focus on financial inclusion, local development finance, and investment finance, UNCDF collaborates with other UN entities to combine its capital tools, expertise, and risk tolerance with their thematic knowledge – taking an integrated approach to test financing innovations, tackle exclusions, and take proven models to scale.

* \$5 billion includes programme delivery and institutional expenditure.

PARTNERS

SHAKING HANDS WITH THE WORLD

The Sustainable Development Goals provide one agenda for everyone to unite behind: from CEOs and Prime Ministers, to activists and scientists, to academics and financial leaders. At UNDP we are proud that our partnerships span small social enterprises and large global brands like Mars Inc., Baidu, Microsoft and Visa; that we collaborate with small island nations and the world's most populous states; and that we are breaking down the language of North and South.

THANK YOU TO OUR PARTNERS, INCLUDING:

THE GLOBAL FUND, TO FIGHT AIDS, TUBERCULOSIS AND MALARIA

As principle recipient of grants from the Global Fund, UNDP helped deliver last-mile health services in 35 countries.

GREEN CLIMATE FUND (GCF)

The GCF is a critical global platform to respond to climate change by investing in low-emission and climate-resilient development.

GLOBAL ENVIRONMENT FACILITY (GEF)

UNDP is a key partner of GEF, a partnership of governments, implementing agencies, the private sector and civil society to tackle the world's most complex and pressing environmental problems in an integrated way.

THE WORLD BANK

UNDP's partnership with the World Bank is growing to better support the 2030 Agenda, in particular in crisis settings. Beyond finance, in 2018 we launched the Pathways for Peace report and advance critical research for better development results.

MONTREAL PROTOCOL

Through the Montreal Protocol, UNDP has worked with 120 countries to help eliminate ozone depleting substances – to reverse the damage to the Earth's ozone layer.

THE LION'S SHARE

In 2018 UNDP launched, in partnership with FINCH company and Mars, Inc., The Lion's Share fund for conservation. Through the initiative, partners contribute 0.5 percent of media spend on advertisements that feature animals.

LENDING STAR POWER TO THE SDGs

The influence of Goodwill Ambassadors and celebrity advocates transcends national borders, shining a spotlight on the biggest global issues and promoting the SDGs. Prominent figures in entertainment, arts and sports, they help to raise awareness through campaigns, events, and on-the-ground project visits. Their names, voices, media appeal and social media platforms amplify our reach, tap into new audiences, and mobilize support for the work we do around the world.

PARTNERS

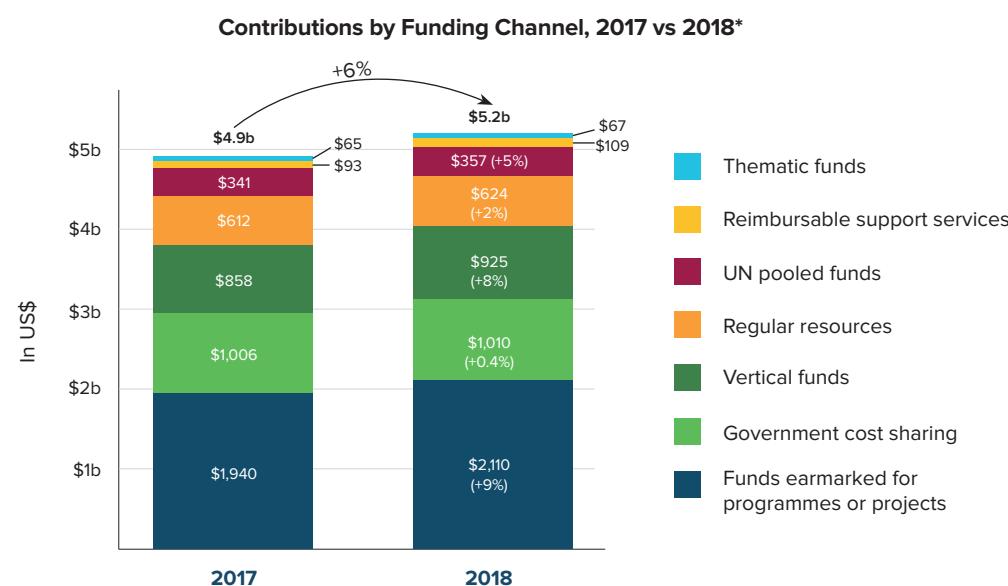

RESOURCES AND CONTRIBUTIONS

At UNDP, we can't do our work without the financial support of our partners. On behalf of the millions of lives that have been changed for good in 2018, and for helping the planet we all inhabit, we say, "Thank You" in every language.

A special thank you to the following regular resources supporters who increased their contributions in 2018:

In 2018, UNDP received
\$392 MILLION
from International Financial Institutions' investments, a 38% increase compared to 2017

*These are voluntary contributions received from funding partners, including Government Local Office Costs, as of May 2019.

HOW

CONNECTING THE WORLD

Helping countries connect knowledge, build capacity, and facilitate partnerships

UNDP is a trusted and active partner in advancing South-South Cooperation, with diversifying financial flows. In 2018, over 100 country offices advanced South-South and triangular cooperation, supporting partnerships with 180 countries through 900 initiatives.

At the same time, 20 percent – or \$1 billion – of UNDP finances came from programme countries for investment in their own countries in 2018, illustrating how development finance flows are changing.

Advanced over
900
